Education

Western Governors University — Millcreek, UT
Bachelor of Science in Software Engineering — *Anticipated Graduation: May 2027*

Harper College — Palatine, IL
Associate of Applied Science in Information Systems — *Graduated: May 2025*

Technical Skills & Coursework

- **Languages**: Python, Java, JavaScript, TypeScript, SQL
- **Frameworks & Technologies**: React.js, Node.js, Flask, Django, FastAPI, Firebase, Kubernetes, Docker, Git, Flutter
- **Relevant Coursework**: DSA, Database Management, Computer Networks, Operating Systems, SWE

Experience

Software Engineer Intern — *CacheAI (Remote)* — Kansas City, KS — Summer 2025

- Built dynamic candidate/job pages using Next.js 13, improving frontend performance.
- Implemented API routes and Prisma ORM integration for secure CRUD operations with Google Auth.
- Contributed in agile sprints, including feature planning, testing, and end-to-end development.

Software Developer Intern — *WebSurfing Studios (Remote)* — Austin, TX — Summer 2025

- Collaborated on internal contributor platform design with real-time sync and schema-driven UI.
- Shipped weekly features with CI/CD pipelines, design reviews, and PR ownership.

Founder & Lead Developer — *Aurify* — Chicago, IL — 2025

- Built AI-powered communication coach web app generating personalized mock conversations.
- Implemented scenario-based quizzes and conversation generation tailored to user profiles.
- Launched MVP to 30+ beta users; iterated rapidly to improve UX and accuracy.

Projects

Interview Scheduler | *Spring Boot, React, Kubernetes, Docker, Ansible, Jenkins* — 2025

- Developed a microservices-based interview scheduling platform with role-based workflows using Spring Boot and React.
- Containerized services with Docker and deployed on Kubernetes, enabling autoscaling and fault isolation.
- Built CI/CD pipelines with Jenkins and Ansible, automating deployments and reducing setup time by 40%.

Wandr (Lifestyle Relocation AI) | *React, Flask, Firebase, Gemini AI* — 2025

- Built AI-driven system to recommend optimal city locations using user behavior profiling and context-aware mapping.
- Implemented prompt-tuned profiling, persistent location saving, and async session restoration.
- Achieved high satisfaction in pilot study with 25+ users using personalized recommendations from Google Takeout data.

Knowly (AI Learning Companion) | *React, Azure Functions, Gemini, Cosmos DB* — 2025

- Created an adaptive learning companion using Gemini that converts static content into personalized, multimodal study tools.
- Integrated OCR, YouTube scraping, and multimodal pipelines to support diverse learning styles.
- Tested by 25+ students with positive engagement and retention outcomes.

Hackathons

- **BugBot** (HawkHacks — *Best Overall Project*): AI debugging assistant leveraging OpenAI and Flask to optimize developer onboarding.
- **ChemoPal** (UncommonHacks): AI-powered voice/text companion using Gemini and Twilio for chronic illness support.
- **FitPets** (WildHacks): Gamified habit tracker with Django backend and AI-generated health tips; tested with event users.
- **StudyFi** (HSHacks): AI study tool featuring flashcards, Q&A, and semantic suggestions; adopted by participants.
